Q. Rearrange Array elements by sign.

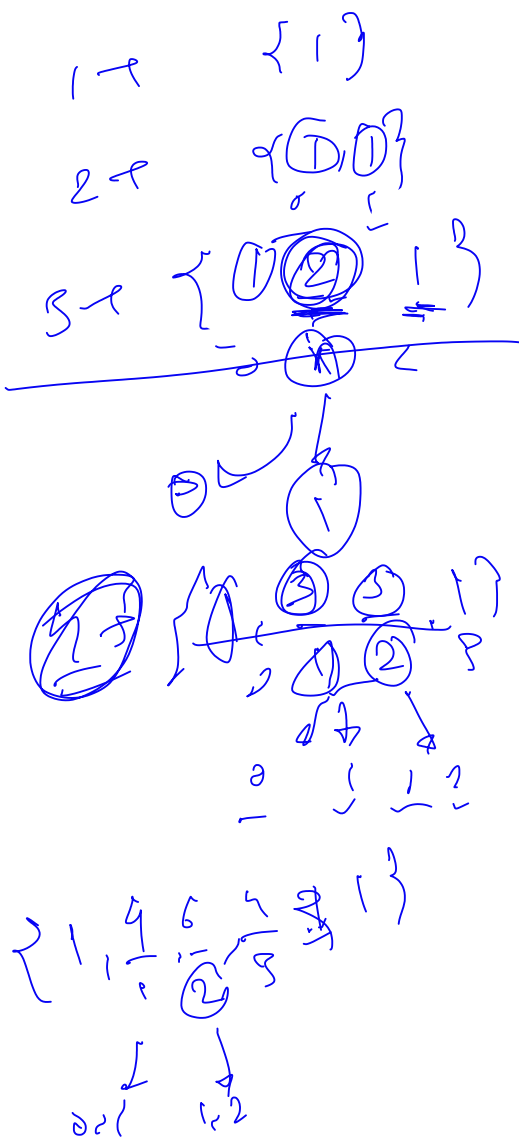

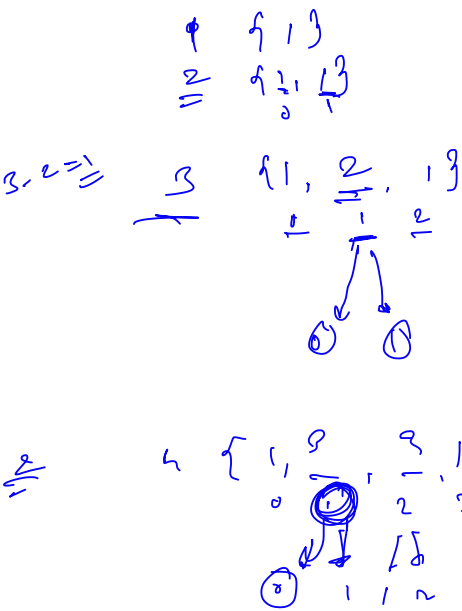

Q. Pascal's Triangle

I/p - n = number of rows
n = 4

list.get(i)
list.add(10); } arr[i]
arr[i] = 10

Code -

n=1, 1 1
n=2, 1 1 1

List<Integer> a1 = new ArrayList<>(); n=3

a1.add(1);
if(n==1){
return a1;
}

a1.add(1);
if(n==2){
return a1;
}

for(int i=3; i<=n; i++){

List<Integer> curr = new ArrayList<>();

curr.add(1);

for(int j=1; j<=i-2; j++){

int num = a1.get(j-1) + a1.get(j);

curr.add(num);

curr.add(1);
print(curr);

a1 = curr;
